

Do you want to bring that sparkle back to your products?

Ideal Service for your Products

With a 25 year life expectancy Wallgate's solid surface products are designed to take years of hard work, and on some occasions abuse. Some hand wash driers will cycle over 100,000 times a year in the harshest of environments, with associated sanitary ware products subject to similarly heavy use.

Although perfectly fit for purpose and still going strong after many years' tough service they may well be starting to look a little tired. Wallgate is therefore pleased to announce the introduction of our solid surface deep cleaning and restoration service.

Using our own expert solid surface technicians, we will come to your location and with the items still in situ give your tired and dirty solid surface sanitary ware a thorough deep clean, followed by a re-finishing and re-sealing process. We'll leave it looking fresh, clean and lustrous, ready to continue providing many more years of reliable and efficient service.

Seven great reasons to have the Wallgate Deep

1. Encourages better hygiene
2. Less susceptible to vandalism
3. Reduces daily cleaning time
4. Eliminates the need for replacement
5. Ensures surfaces are properly re-sealed
6. Removes all surface build up and deposits
7. Removes or smoothes out surface scratches and chips

Wallgate[®]
ROBUST. INNOVATIVE. WASHROOMS

Wallgate® offers the solution... the new “Deep Clean Service”!

“Wallgate’s Deep Cleaning team did an excellent job of removing the hair dye stain in the bath. Although I’d definitely recommend if hair dye is ever used, to make sure it is rinsed off immediately!”

Nigel Stirland – Site Manager: Kier – Aldine House
Secure Children’s Centre

“We had an annual deep clean before the kids came back to school and the products cleaned up beautifully”

Nick Trimby – Site Manager – Kingdown
School

“The Wallgate Deep Cleaning Team came to HMP Rochester as part of a refurbishment project. We hadn’t been allowed cleaning chemicals so the basins and WC’s badly needed attention. I couldn’t believe they got those pans looking like new. I found the whole project was organised and commissioned efficiently, especially since they had to work in a live prison environment. A great job!”

David Smith – Project Manager – De Boer Structures
